Presents

DESIGNING — for the — FUTURE

14th-15th FEBRUARY 2019
NEHRU CENTRE, MUMBAI

DESIGNING FOR THE FUTURE

The world is changing faster than ever – socially, technologically, environmentally, politically, and economically. In the midst of these shifts, designers have the crucial task of thinking about what our future will look like and how we will interact with it.

The future of design will be more about what we do with our time through an array of technology - supported options. Sustainability and the need to mitigate the impact of climate change will also require advanced technological solutions to improve energy efficiency. Designers and architects' role will be to anticipate people's interactions with technology and provide them with products, living and working spaces that help solve the many challenges the future will bring.

THURSDAY, 14TH FEBRUARY, 2019

Registration at 8.45 am
